A. Course objective
The course will provide knowledge of private law in transformation and its economic consequences. Within the semester the student will become familiarized with major concepts of private law in transformation concerning company and contract law, as well as property rights issues. The course will reveal how particular sections of private law have changed. What is more, the course will be focused on comparative analysis of fiscal systems and secured transactions in post-soviet countries in Europe. The last part of the course will address problems of bankruptcy and reorganization, as well as labour market regulations especially legal services and industrial relations.

B. Course syllabus

C. Educational outcome

A. Course objective

The main questions that will be dealt with in the course are: How did the legal system reforms proceed in post-soviet states in Europe? What are the differences in legal systems across transition countries and what are the economic implications of these differences? In the first part, the course offers a comparative analysis of constitutional law focusing on the economic analysis of constitutional design and economic effects of constitutions, as well as judicial system transformation. In the second part, the course investigates the regulatory framework of financial and consumer market, as well as the central banking system across transition countries. In the third part, the course focuses on cross-country analysis of public sector control institutions and the privatization process.

B. Course syllabus

C. Educational outcome

Knowledge
